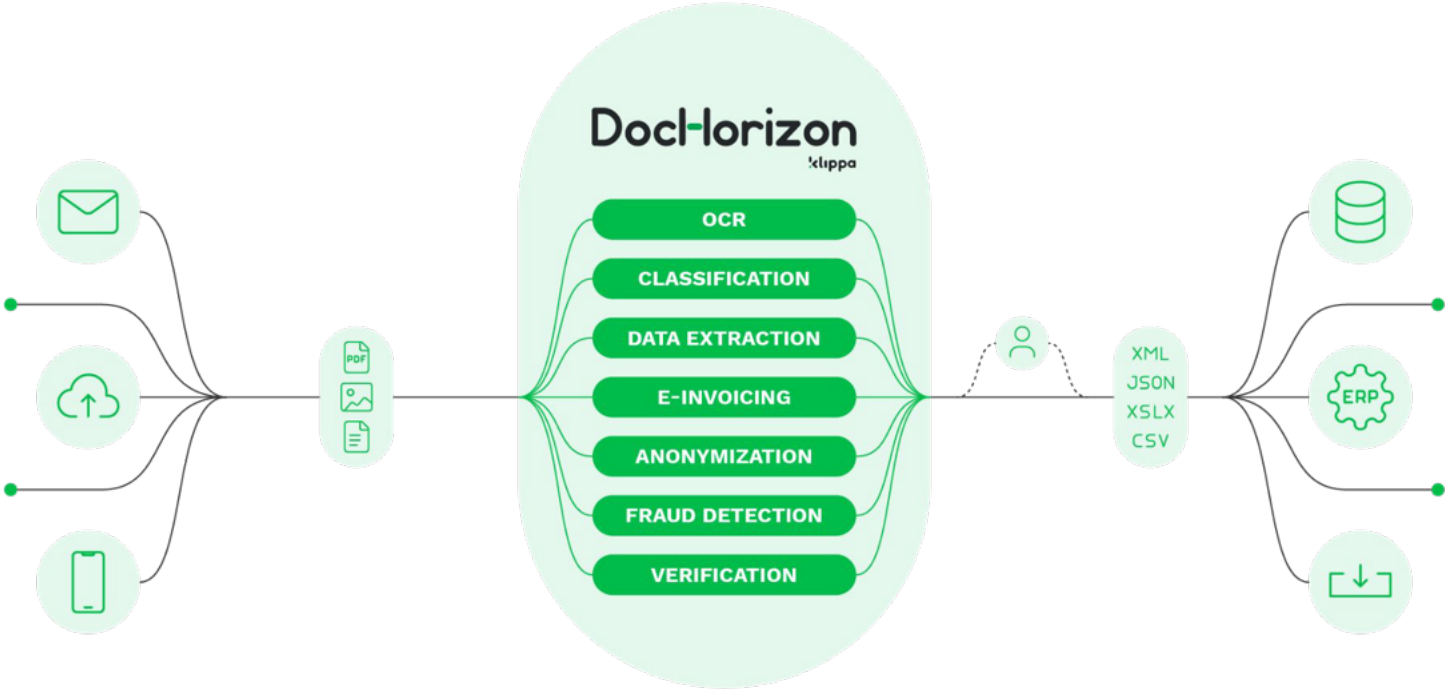
THE SOLUTION: DOCHORIZON



DocHorizon

klippa

Klippa's DocHorizon, Intelligent Document Processing (IDP) software is a solution designed to automate any document-related processes.

With AI-powered OCR, you can forget about the nightmares of manual tasks such as data entry.

- Seamless API integration into any environment
- Automates document verification, anonymisation and data extraction
- Adaptable approach can be applied to any document type

WHAT'S NEXT

From Fraudsters:

- More attempts
- Evolution of fraud techniques

From Regulators:

- More compliance requirements
  - KYC / KYB
  - Transaction monitoring
  - Sanction lists

For Businesses:

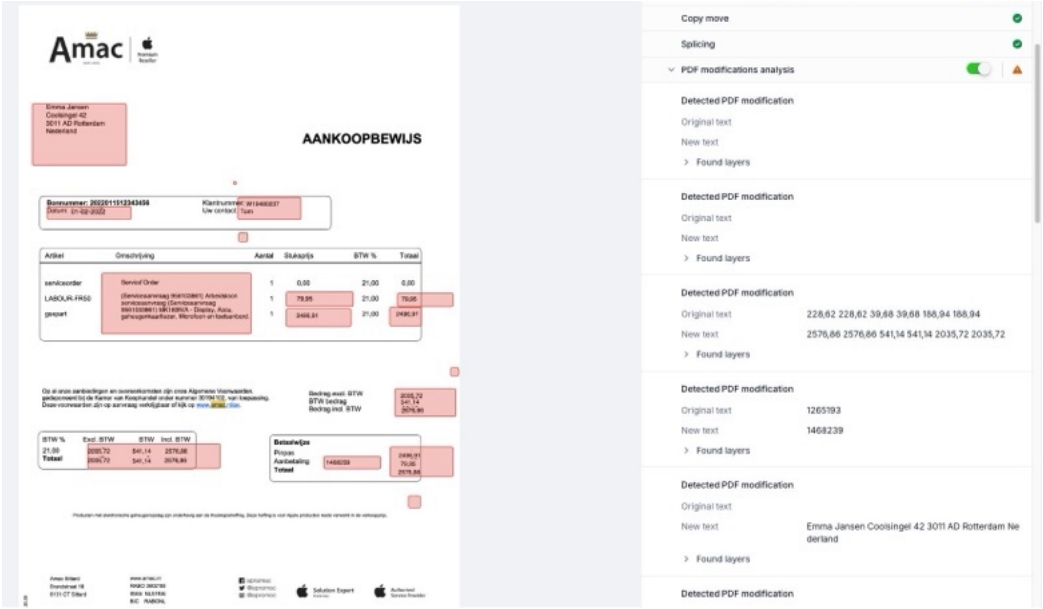
- More identification
- More automation

WHAT'S NEXT FROM KLIPPA

- First layer: automation
  - API for document checks
  - SDK for KYC
- Second layer: visual representation
  - Visual checks by internal fraud desk
  - Fully outsourced to our experts

More to come:

- X-ray on PDFs
- Enhanced image forensics
- Multimodal analysis
- Third party integrations
- Download PDF reports



DATA & PRIVACY

Our solutions are hosted in an environment that is compliant with certifications ISO 27001, ISO 27017, ISO 27018, FedRAMP, SOC 1 and SOC 2. Klippa uses Azure servers in Amsterdam. Klippa performs a continuous monitoring and automates backups where needed.

Klippa uses **secure** connections (SSL), **encryption** and periodic third party **penetration testing**.

Klippa is built within the European legal framework of **GDPR**. Solutions are built as compliant by design.
