

# Ignite your potential

With our powerful process modeling and intelligent workflow automation platform.

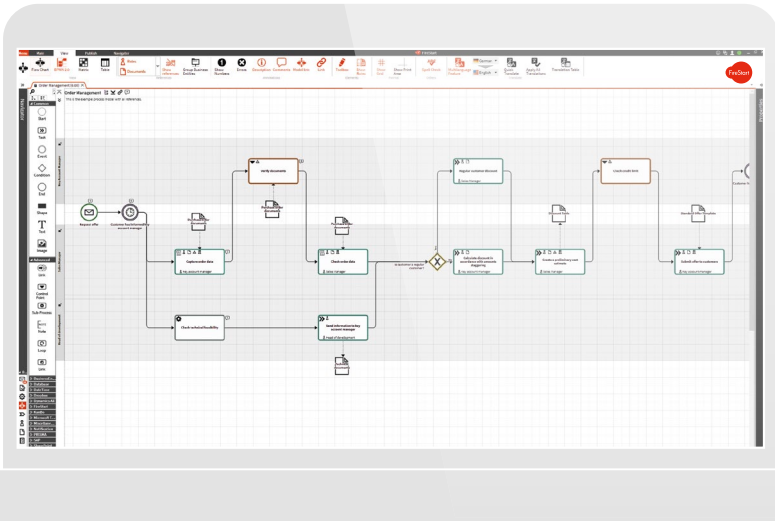

[www.firestart.com](http://www.firestart.com)

- ✓ **Easy to use**  
No coding needed
- ✓ **Super fast**  
Built within days
- ✓ **Scalable**  
Adapting to your needs
- ✓ **Flexible**  
Integrates with your IT

# Explore the FireStart BPM Platform

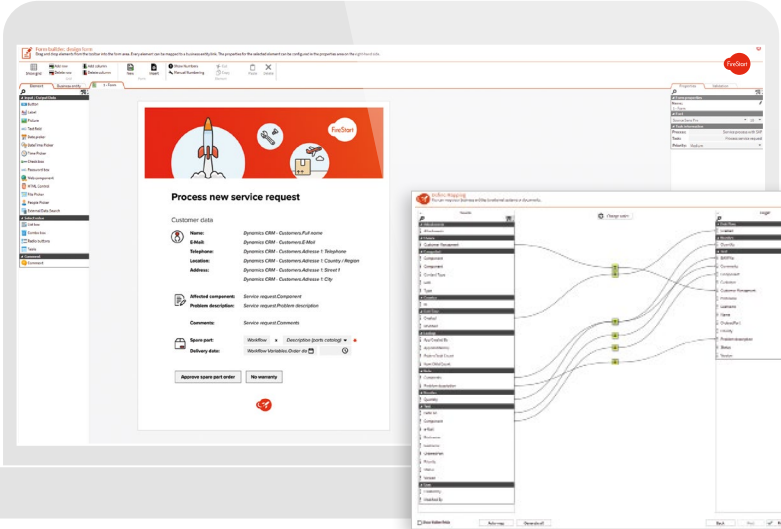

## 1 Model

Modeling is the foundation of intelligent business process automation. FireStart enables you to model complex processes with ease using our intuitive designer. Simply drag and drop elements onto the graphical mapping interface to map your processes.

- ✓ Increase transparency
- ✓ Achieve process governance
- ✓ See process growth over time with version history
- ✓ Collaborate on process design and improvement
- ✓ Manage human resources, documents, risks, and IT systems

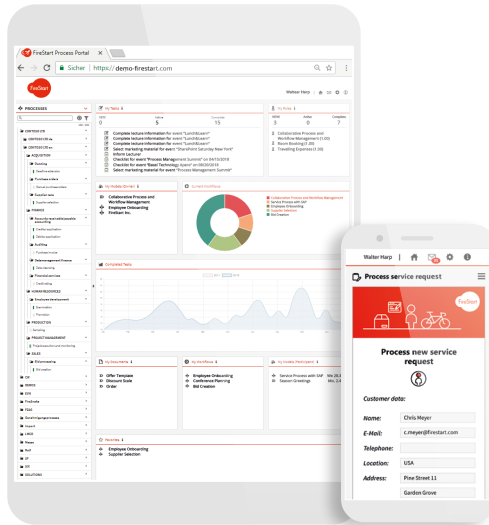

2

Transform your business processes into executable workflows. Whether you need to automate HR, order requisition or customer support processes, we can adapt with your needs and quickly transform processes into automated and digitalized workflows. Thanks to our unified and comprehensive BPM platform, simply connect your line-of-business applications with human-centric workflows.

- ✓ Centralized workflow and task management
- ✓ Custom forms designer
- ✓ Business rules design and management
- ✓ No/Low code approach
- ✓ Task management plugins for Outlook, SharePoint and SAP Fiori

## 3 Improve

Once you've successfully automated your workflows, take a step back to analyze them with KPI dashboards and drill down reports. Intelligent automation with FireStart provides you with runtime metrics and valuable insights into how your business performs in practice. Get even deeper understanding with third-party integration to BI and process mining toolsets.

- ✔ KPI management, reports and personalized dashboards
- ✔ API extensions and third party BI/process mining integration
- ✔ Contextualize workflow data with your systems of records
- ✔ Optimize process costs and execution times
- ✔ Collect and analyze workflow runtime metrics

# Master Complexity. Build Efficiency. Intuitively.

## Process Modeling

Enhanced process modeling allows you to build complex flowcharts and manage process documents, resources, risks and IT systems with performance metadata.

## Workflow Automation

Powerful productivity gains are within your reach: Transform your processes into executable workflows by connecting them to your IT systems with a low-code approach.

## Process Intelligence

Get valuable insights into your workflow execution performance with FireStart's process intelligence toolkit and improve your business step by step.

## We've got you covered

We provide all the  
integrations you need.

# Ignite your potential
